Enumeration

# Alarm.Schedule

A list of all types of schedules that the framework supports.

iOS 26.0+ | iPadOS 26.0+

`enum` Schedule

## Topics

### Setting an alarm schedule

`struct` Relative

An object that describes when an alarm alerts, relative to the device's timezone.

`case` fixed(Date)

A one-shot alarm that fires at a specific time, not a time relative to the current time zone.

`case` relative(Alarm.Schedule.Relative)

An alarm that can repeat and fire at a time relative to the device's current time zone.

## See Also

### Setting an alarm schedule

```
var schedule: Alarm.Schedule?
```

The schedule determines when the alarm alerts.
