

[FinanceKit](#) / [FinanceStore](#) / FinanceStore.HistoryToken

## Structure

# FinanceStore.HistoryToken

A structure that describes the starting point to use for financial data queries.

iOS 17.4+ | iPadOS 17.4+

```
struct HistoryToken
```

## Overview

The framework returns this as part of a [FinanceStore.Changes](#) instance when iterating over a History sequence.

## Topics

### Initializers

```
init(from: any Decoder) throws
```

Initializes a new history token using data from the provided decoder.

### Instance Methods

```
func encode(to: any Encoder) throws
```

Encodes the history token into the provided encoder.
