

[SwiftUI](#) / [Section](#) / `init(content:header:)`

Initializer

`init(content:header:)`

Creates a section with a header and the provided section content.

iOS 13.0+ | iPadOS 13.0+ | Mac Catalyst 13.0+ | macOS 10.15+ | tvOS 13.0+ | visionOS 1.0+ | watchOS 6.0+

```
init(  
    @ViewBuilder content: () -> Content,  
    @ViewBuilder header: () -> Parent  
)
```

Available when `Parent` conforms to `View`, `Content` conforms to `View`, and `Footer` is `EmptyView`.
