

[SwiftUI](#) / [View](#) / `menuStyle(_:)`

Instance Method

menuStyle(_:)

Sets the style for menus within this view.

iOS 14.0+ | iPadOS 14.0+ | Mac Catalyst 14.0+ | macOS 11.0+ | tvOS 17.0+ | visionOS 1.0+

```
nonisolated
func menuStyle<S>(_ style: S) -> some View where S : MenuStyle
```

Discussion

To set a specific style for all menu instances within a view, use the `menuStyle(_:)` modifier:

```
Menu("PDF") {
    Button("Open in Preview", action: openInPreview)
    Button("Save as PDF", action: saveAsPDF)
}
.menuStyle(ButtonMenuStyle())
```
