Case

BGContinuedProcessingTaskRequest.SubmissionStrategy.queue

An option that queues a continuous background task to begin as soon as possible.

iOS 26.0+ | iPadOS 26.0+

case queue

Mentioned in

 Performing long-running tasks on iOS and iPadOS

Discussion

This option adds the task request to the back of a queue. The system runs the task as soon as possible. The system might be unable to run a submitted task immediately if the system is currently at the maximum level of concurrent tasks.

Important

The system cancels queued `BGContinuedProcessingTaskRequest` objects if someone closes your app using the app switcher.
