

[Authentication Servi...](#) / [ASAuthorizationControllerDelegate](#) authorizationController(\_:didCompleteWithCustomMethod)

## Instance Method

# authorizationController(\_:didCompleteWithCustomMethod:)

Notifies the delegate when authorization completes, and specifies the custom method the user selected.

tvOS 15.0+

```
@MainActor
optional func authorizationController(
    _ controller: ASAuthorizationController,
    didCompleteWithCustomMethod method: ASAuthorizationCustomMethod
)
```

## Parameters

### controller

The controller performing the authorization attempt.

### method

The custom method the user selected. For a list of custom methods, see [ASAuthorizationCustomMethod](#).
