API Collection

Browser View

Provide a column-based interface for viewing and navigating hierarchical information.

Topics

View

```
class NSBrowser
```

An interface that displays a hierarchically organized list of data items that can be navigated and selected.

Management

```
protocol NSBrowserDelegate
```

A set of methods that a browser delegate implements to manage selection, scrolling, sizing, and other behavior.

Cell

```
class NSBrowserCell
```

The user interface of a browser.

See Also

Content views

☰ Collection View

Display one or more subviews in a highly configurable arrangement.

☰ Outline View

Display a list-based interface for hierarchical data, where each level of hierarchy is indented from the previous one.

☰ Table View

Display custom data in rows and columns.

`class` `NSTextView`

A view that draws text and handles user interactions with that text.
