

[App Store Connect API](#) / User Invitations

API Collection

User Invitations

Email invitations to join your App Store Connect team.

Overview

The `userInvitations` resource represents users who have been invited to join a team in App Store Connect. When you create a user invitation the user receives an email with a link to activate an account and connect it to their Apple Account.

If the user accepts the invitation, the user is added to the team and the invitation is deleted. User invitations expire after three days.

You can also get a list of all invited users, read the invite information of a single user, and find out which apps an invited user can test.

Topics

Getting Invited Users

List Invited Users

Get a list of pending invitations to join your team.

Read User Invitation Information

Get information about a pending invitation to join your team.
