

[AlarmKit](#) / [AlarmAttributes](#) / metadata

Instance Property

metadata

The additional data you can include in your attributes.

iOS 26.0+ | iPadOS 26.0+

```
var metadata: Metadata?
```

Discussion

The additional data can be information that describes extra UI features you want to include in your countdown UI.

See Also

Creating an alarm attribute

```
init(presentation: AlarmPresentation, metadata: Metadata?, tint_color: Color)
```

Creates an instance of an alarm UI.

```
var tint_color: Color
```

The tint color applied to the templated UI.

```
var presentation: AlarmPresentation
```

The content required for the various states of the UI.

```
typealias ContentState
```

The type alias for the structure that describes the content of an alarm.
