## Sample Code

# Building a great Mac app with SwiftUI

Create engaging SwiftUI Mac apps by incorporating side bars, tables, toolbars, and several other popular user interface elements.

[Download](#)

macOS 12.0+ | Xcode 13.0+

## Overview

### Note

This sample code project is associated with WWDC21 sessions: [10062: SwiftUI on the Mac: Build the Fundamentals](#) and [10289: SwiftUI on the Mac: The Finishing Touches](#).

## See Also

### Creating a table

```
struct Table
```

A container that presents rows of data arranged in one or more columns, optionally providing the ability to select one or more members.

```
func tableStyle<S>(S) -> some View
```

Sets the style for tables within this view.
