

[Network](#) / NSError

Enumeration

NSError

The errors returned by objects in the Network framework.

iOS 12.0+ | iPadOS 12.0+ | Mac Catalyst 12.0+ | macOS 10.14+ | tvOS 12.0+ | visionOS 1.0+ | watchOS 5.0+

`enum` NSError

Topics

Checking Error Types

`case posix(POSIXErrorCode)`

A POSIX error, which is used for most network protocol and routing errors.

`case dns(DNSServiceErrorType)`

A DNS error encountered in resolving, browsing, or advertising.

`case tls(OSStatus)`

A TLS error reported by a TLS connection or listener.

Enumeration Cases

`case wifiAware(Int32)`

The error code will be a Wi-Fi Aware error as defined in `<WifiAware/errors.swift>`

Instance Properties

```
var wifiAware: WLError?
```

The underlying error that occurred, if applicable.
