

[UIKit](#) / Handwriting recognition

API Collection

Handwriting recognition

Configure text fields and custom views that accept text to handle input from Apple Pencil.

Topics

Essentials

Customizing Scribble with Interactions

Enable writing on a non-text-input view by adding interactions.

Text fields

```
class UIScribbleInteraction
```

An interaction for customizing the behavior of Scribble on text input views, or for suppressing it entirely in specific cases.

```
protocol UIScribbleInteractionDelegate
```

Methods for customizing or suppressing Scribble behavior within text input views.

Custom views

```
class UIIndirectScribbleInteraction
```

An interaction for using Scribble to enter text by writing on a view that isn't formally a text input.

```
protocol UIIndirectScribbleInteractionDelegate
```

Methods that customize behavior on views that aren't formally text input views.

`associatedtype ElementIdentifier : Hashable = String`

A unique identifier for a control that isn't a text field in a Scribble interaction.

Required

See Also

Text

☰ Text display and fonts
Display text, manage fonts, and check spelling.

☰ TextKit
Manage text storage and perform custom layout of text-based content in your app's views.

☰ Keyboards and input
Configure the system keyboard, create your own keyboards to handle input, or detect key presses on a physical keyboard.

☰ Writing Tools
Add support for Writing Tools to your app's text views.
