

[Visual Intelligence](#) / [SemanticContentDescriptor](#) / labels

Instance Property

labels

A list of labels that visual intelligence uses to classify items onscreen or visual intelligence camera.

iOS 26.0+ | iPadOS 26.0+ | Mac Catalyst 26.0+

```
let labels: [String]
```

Mentioned in

 Integrating your app with visual intelligence

Discussion

Visual intelligence defines the possible label values. Use them to search for content in your app, for example, `book` or `car`, and return matching content to visual search.
