

[App Store Connect API](#) / Devices

API Collection

# Devices

Register devices for development and testing.

## Overview

A devices resource represents the iOS, Apple TV, Apple Watch, and Mac devices that you register to use for development and testing. You can register a limited number of new devices and get information about them.

### Note

You can only remove registered devices through the Apple Developer website.

## Topics

### Registering a Device

Register a New Device

Register a new device for app development.

### Getting Device Information

List Devices

Find and list devices registered to your team.

Read Device Information

Get information for a specific device registered to your team.

## Modifying Device Metadata

### Modify a Registered Device

Update the name or status of a specific device.

## Objects

### `object Device`

The data structure that represents a Devices resource.

### `object DevicesWithoutIncludesResponse`

### `object DeviceCreateRequest`

The request body you use to create a Device.

### `object DeviceUpdateRequest`

The request body you use to update a Device.

### `object DeviceResponse`

A response that contains a single Devices resource.

### `object DevicesResponse`

A response that contains a list of Devices resources.
