

[Foundation](#) / Bonjour

API Collection

Bonjour

Advertise services for easy discovery on local networks, or discover services advertised by others.

Topics

Local Network Services

~~class~~ **NetService**

A network service that broadcasts its availability using multicast DNS.

Deprecated

protocol **NetServiceDelegate**

The interface a net service uses to inform its delegate about the state of the service it offers.

NSBonjourServices

Bonjour service types browsed by the app.

NSLocalNetworkUsageDescription

A message that tells people why the app is requesting access to the local network.

Service Discovery

~~class~~ **NetServiceBrowser**

A network service browser that finds published services on a network using multicast DNS.

Deprecated

protocol **NetServiceBrowserDelegate**

The interface a net service browser uses to inform a delegate about the state of service discovery.
