

[UIKit UI](#) / [EKEventEditViewController](#) / event

Instance Property

event

The event the user creates or edits using this view controller.

iOS 4.0+ | iPadOS 4.0+ | Mac Catalyst 13.1+ | visionOS 1.0+

```
@MainActor
var event: EKEvent? { get set }
```

Discussion

If `nil`, creates and adds a new event to the default calendar's event store. To avoid throwing an exception, ensure that the event is in the specified event store.

See Also

Creating and Saving Events

```
var eventStore: EKEventStore!
```

The event store used to save the event.
