

[Accounts](#) / [ACAccountType](#) **Deprecated**

## Class

# ACAccountType **Deprecated**

An object that encapsulates information about all accounts of a particular type.

iOS 6.0–15.0 **Deprecated** | iPadOS 6.0–15.0 **Deprecated** | Mac Catalyst 13.1–15.0 **Deprecated** |

macOS 10.8–12.0 **Deprecated**

```
class ACAccountType
```

### Deprecated

Use appropriate non-Apple SDK corresponding to the type of account you want to reference instead

## Overview

You don't create account type objects directly. To obtain an account type object, use the [accountType\(withAccountTypeIdentifier:\)](#) method or the [accountType](#) property of an account object. Use the [accounts\(with:\)](#) method to obtain all accounts of a particular type.

## Topics

### Accessing Properties

```
var accessGranted: Bool
```

A Boolean value indicating whether the user granted the application access to accounts of this type.

~~var accountTypeDescription: String!~~

A human-readable description of the account type.

~~var identifier: String!~~

The unique identifier for the account type.
