June 2024

Spatial audio with AUSpatialMixer

- Adjust the spatial mixer orientation to match someone's head pose via compatible AirPods by setting the new `kAudioUnitProperty_SpatialMixerEnableHeadTracking` property to true. The system requires your app to have the `com.apple.developer.coremotion.head-pose` entitlement to observe this property.
- Tailor spatial mixing output according to a person's personalized spatial audio profile that they configure in Settings by adding the `com.apple.developer.spatial-audio.profile-access` entitlement to your app.
- Instruct spatial mixing to ignore the new system spatial audio toggle in Control Center by adding the `AVGameBypassSystemSpatialAudio` key to your app's `Info.plist`.
