

[App Store Server API](#) / environment

Type

# environment

The server environment, either sandbox or production.

App Store Server API 1.0+

string environment

---

## Possible Values

### Sandbox

Indicates that the data applies to testing in the sandbox environment.

### Production

Indicates that the data applies to the production environment.

## Mentioned in

 [App Store Server API changelog](#)

## Discussion

You receive data from the [App Store Server API](#) for the sandbox environment when you send test requests to the endpoints using the sandbox base URL:

<https://api.storekit-sandbox.itunes.apple.com/>
