

[Wi-Fi Aware](#) / [...](#) / [WAPublisherListener.Devices](#) / `matching(_:)`

## Type Method

# matching(\_:)

Includes only paired devices matching the provided live filter predicate.

iOS 26.0+ | iPadOS 26.0+

```
static func matching(_ pairedDevicesFilter: Predicate<WAPaired  
Device>) -> WAPublisherListener.Devices
```

## Parameters

### `pairedDevicesFilter`

The filter to apply to choose paired devices for this operation.

## Return Value

A new `Devices` containing the device filter to use.
