

[AppKit](#) / [NSAccessibility](#) / `screenRect(fromView:rect:)`

## Type Method

# screenRect(fromView:rect:)

Returns the frame in screen coordinates.

macOS 10.10+

```
static func screenRect(  
    fromView parentView: NSView,  
    rect frame: NSRect  
    ) -> NSRect
```

## Discussion

Given a frame in the specified view's coordinates, it returns the same frame in the screen's coordinates.
