

[MapKit](#) / [MapContent](#) / [mapItemDetailSelectionAccessory\(_:\)](#)

Instance Method

mapItemDetailSelectionAccessory(_:)

Specifies the selection accessory to display for the selected map item content.

📱 MapKit | 📱 SwiftUI | iOS 18.0+ | iPadOS 18.0+ | Mac Catalyst | macOS 15.0+ | visionOS 2.0+

```
@MainActor @preconcurrency
func mapItemDetailSelectionAccessory(_ style: MapItemDetailSelectionAccessory
Style? = .automatic) -> some MapContent
```

Parameters

style

The map item detail selection accessory style. If `nil`, no selection accessory appears.

See Also

Place information

```
struct MapItemDetailSelectionAccessoryStyle
```

The map item detail selection accessory style.

```
static func callout(MapItemDetailSelectionAccessoryStyle.CalloutStyle)
-> MapItemDetailSelectionAccessoryStyle
```

Presents the accessory as an annotation callout on the map.
