

[SwiftUI](#) / [View](#) / `scrollEdgeEffectStyle(_:for:)`

Instance Method

scrollEdgeEffectStyle(_:for:)

Configures the scroll edge effect style for scroll views within this hierarchy.

iOS 26.0+ | iPadOS 26.0+ | Mac Catalyst 26.0+ | macOS 26.0+ | tvOS 26.0+ | watchOS 26.0+

```
nonisolated
func scrollEdgeEffectStyle(
    _ style: ScrollEdgeEffectStyle?,
    for edges: Edge.Set
) -> some View
```

Discussion

By default, a scroll view renders an automatic edge effect. Use this modifier to change the scroll edge effect style.

```
ScrollView {
    LazyVStack {
        ForEach(data) { item in
            RowView(item)
        }
    }
}
.scrollEdgeEffectStyle(.hard, for: .all)
```
