

[DeviceDiscoveryUI](#) / DevicePairingView

Structure

DevicePairingView

A control that allows a user to become discoverable and advertise to local devices.

📱 DeviceDiscoveryUI | 📱 SwiftUI | iOS 26.0+ | iPadOS 26.0+ | Mac Catalyst 26.0+

```
@MainActor @preconcurrency
struct DevicePairingView<Label, Fallback> where Label : View, Fallback : View
```

Overview

A `DevicePairingView` should be used to become discoverable to local devices from the user through a button interface.

Topics

Initializers

```
init(any ListenerProvider, access: DDDevicePairingAccess, label: () ->
Label, fallback: () -> Fallback)
```

Creates a `DevicePairingView` which, when pressed, will display a local device advertiser interface.
