

[ARKit](#) / [...](#) / [ARKitSession.Event](#) / ARKitSession.Event.authorizationChanged(type:status:)

Case

ARKitSession.Event.authorizationChanged(type:status:)

An event that represents a change in authorization status for a specific authorization type.

visionOS 1.0+

```
case authorizationChanged(  
    type: ARKitSession.AuthorizationType,  
    status: ARKitSession.AuthorizationStatus  
)
```

Parameters

type

The type of authorization status that changed.

status

The new state of authorization.
