VSError.Code

Error codes in the framework error domain.

iOS 10.0+ | iPadOS 10.0+ | macOS | tvOS 10.0+ | visionOS 1.0+

`enum` Code

Topics

Error Codes

`case` accessNotGranted

The user hasn't granted access to their subscription information.

`case` invalidVerificationToken

The user's subscription provider rejected the verification token that the app sent with the request.

`case` providerRejected

The user's subscription provider didn't allow the request to proceed.

`case` rejected

The system rejected the request.

`case` serviceTemporarilyUnavailable

The request failed due to a timeout or unreachable host, but a subsequent attempt might succeed.

`case` unsupported

The provider doesn't support the feature the user requested in the device's current region.

`case unsupportedProvider`

The system doesn't support the user's subscription provider.

`case userCancelled`

The user canceled the request.

Initializers

`init?(rawValue: Int)`
