# VisionKit Live Text Usage

Review information about how people interact with Live Text.

## Overview

The data in this report contains aggregated details about interactions with live text. It includes the length of selections, the word counts, and the total words found in the image.

- Territories: Worldwide
- Platforms: iOS, iPadOS. For more information about iOS and iPadOS, see the Platforms section in [Data Completeness and Corrections](#).
- Availability:
  - Daily: Every day.
- History: On request, data is available beginning with iOS 17.4 and iPadOS 17.4.
- Completeness: Data from devices that contribute to this report can arrive as late as 8 days after the date it generates on device. You can download recent data daily, but it might be incomplete, and data updates incrementally daily, until all late-arriving events are available.
- Privacy:
  - Includes data from users who have opted to share their data with Apple and developers.
  - Individual rows will only appear if they have a value of 5 or more.
- Data Context: You can analyze your data with additional context by comparing it with the data in the [App Sessions Context](#) report, which provides a count of unique devices that use your app on a specific day. For example, if your app performed an action detailed in this report on 10 unique devices on a specific day, and the App Sessions Context report shows there were 100 unique devices running your app that day, then you can approximate that 10% of the devices running your app performed that action.

# Report Fields

Report Field	Description	Data Type
Count	Number of times the event occurred	integer
Territory	Country or region in which the event occurred	string
Date	Date when the event occurred	string
Platform	OS version on the device on which the event occurred	string
Device	Type of device on which the event occurred	string
Build	Build of device on which event occurred	string
Unique Devices	The count of unique devices	integer
Release Type	Type of software release	string
Event Type	Whether the user interacts with live text via a selection change, copying, or selecting all	string
Rich Pasteboard	Whether the selected text has rich pasteboard content	boolean
Selection Length	The character count of the user's selection	integer
Selection Word Count	The number of words in the user's selection	integer
Total Text Length	The full length of all of the text found in the image	integer

# Glossary

Dimension	Value	Definition
Event Type	SelectionChanged	Triggered if a selection changes
Event Type	Copy	Triggered if copy is invoked
Event Type	SelectAll	Triggered if select all is invoked
