

[Wi-Fi Aware](#) / [...](#) / [WAPublisherListener.Devices](#) / `selected(_:)`

Type Method

selected(_:)

Includes only the preselected paired devices in the provided dictionary.

iOS 26.0+ | iPadOS 26.0+

```
static func selected(_ pairedDevices: WAPairedDevice.Devices) -> WAPublisher  
Listener.Devices
```

Parameters

`pairedDevices`

A [WAPublisherListener.Devices](#) dictionary holding a snapshot of paired devices to use for this operation.

Return Value

A new `Devices` including the selected devices.

See Also

Selecting specific devices

```
static func selected(some Sequence<WAPairedDevice>) -> WAPublisher  
Listener.Devices
```

Includes only the preselected paired devices in the provided list.

```
static let userSpecifiedDevices: WAPublisherListener.Devices
```

Includes only new devices the user pairs via DeviceDiscoveryUI's DevicePairingView().
