

[SwiftUI](#) / AnyView

## Structure

# AnyView

A type-erased view.

iOS 13.0+ | iPadOS 13.0+ | Mac Catalyst 13.0+ | macOS 10.15+ | tvOS 13.0+ | visionOS 1.0+ | watchOS 6.0+

```
@frozen
struct AnyView
```

---

## Overview

An AnyView allows changing the type of view used in a given view hierarchy. Whenever the type of view used with an AnyView changes, the old hierarchy is destroyed and a new hierarchy is created for the new type.

---

## Topics

### Creating a view

```
init<V>(V)
```

Create an instance that type-erases view.

```
init<V>(erasing: V)
```

---

## Relationships

## Conforms To

View

### Supporting view types

`struct EmptyView`

A view that doesn't contain any content.

`struct EquatableView`

A view type that compares itself against its previous value and prevents its child updating if its new value is the same as its old value.

`struct SubscriptionView`

A view that subscribes to a publisher with an action.

`struct TupleView`

A View created from a swift tuple of View values.
