

[Vision](#) / ComputeStage

Enumeration

ComputeStage

Types that represent the compute stage.

iOS 18.0+ | iPadOS 18.0+ | macOS 15.0+ | tvOS 18.0+ | visionOS 2.0+

```
enum ComputeStage
```

Overview

The main compute stage represents the essential functionality of a request. Requests that provide additional analysis — or conversion of the data by the main stage — can also report a post-processing stage.

Topics

Getting the compute stages

```
case main
```

A stage that represents where the system performs the main functionality.

```
case postProcessing
```

A stage that represents where the system performs additional analysis after the main compute stage.
