

[App Store Server API](#) / `MassExtendRenewalDateRequest`

## Object

# MassExtendRenewalDateRequest

The request body that contains subscription-renewal-extension data to apply for all eligible active subscribers.

App Store Server API 1.7+

```
object MassExtendRenewalDateRequest
```

## Properties

**requestIdentifier**  
[requestIdentifier](#)

**Required.** A string that contains a one-time UUID value you provide to identify this subscription-renewal-date extension request.  
Maximum length: 128

**extendByDays**  
[extendByDays](#)

**Required.** The number of days to extend the subscription renewal date.  
Maximum: 90

**extendReasonCode**  
[extendReasonCode](#)

**Required.** The reason code for the subscription-renewal-date extension.

**productId**  
[productId](#)

**Required.** The product identifier of the auto-renewable subscription that you're requesting the renewal-date extension for.

**storefrontCountryCodes**  
[storefrontCountryCodes](#)

A list of storefront country codes you provide to limit the storefronts that are eligible to receive the subscription-renewal-date extension. Omit this list to request the subscription-renewal-date extension in all storefronts.

## Mentioned in

## Discussion

This request body applies to the [Extend Subscription Renewal Dates for All Active Subscribers](#) endpoint.

The `requestIdentifier` uniquely identifies this request. Use the same `requestIdentifier` in the following APIs :

- The [Get Status of Subscription Renewal Date Extensions](#) endpoint
- The [summary](#) object in [App Store Server Notifications](#).

For more information, see [Extending the renewal date for auto-renewable subscriptions](#).

---
