

[Bundle Resources](#) / [Entitlements](#) / com.apple.developer.app-migration.data-container-access

## Property List Key

# com.apple.developer.app-migration.data-container-access

An entitlement required for app extensions to perform a one-time transfer of on-device data to or from another platform.

iOS 26.1+ | iPadOS 26.1+

## Details

### Name

App Identifier for OS Data Transfer

### Type

Array of strings

## Discussion

Use this entitlement with the app extension that implements the [AppMigrationExtension](#) protocol from the [AppMigrationKit](#) framework.

The value of this entitlement is an array of strings. Populate this value with a one-item array containing the bundle identifier of the extension's containing app. No other values are valid.
