[Apple Pay Web Merchant API Reference](#) / Get Merchant Details

Web Service Endpoint

# Get Merchant Details

Retrieve information about a registered merchant's current state by using the merchant's internal merchant identifier.

Apple Pay Web Merchant Registration API 1.0+

---

## URL

**GET** `https://apple-pay-gateway.apple.com/paymentservices/merchant/${partnerInternalMerchantIdentifier}`

## Path Parameters

<b>partnerInternalMerchantIdentifier</b>	<b>(Required)</b> A unique identifier for the merchant that the e-commerce partner created and used in the <a href="#">Register Merchant</a> request. string Maximum length: 1024 Value: /a-zA-Z0-9~-_+&@\$! ,.;/
--	--

## Response Codes

<b>200</b>	<b>OK</b>
<a href="#">MerchantDetails</a>	Success. The response contains an object with information for the registered merchant.  Content-Type: application/json
<b>400</b>	<b>Bad Request</b>
	The request is malformed or invalid, or the merchant isn't registered.
<b>401</b>	<b>Unauthorized</b>
	The e-commerce platform doesn't have permission to call this API.

**417    Expectation Failed**

The e-commerce platform isn't registered with Apple Developer.

**500    Internal Server Error**

An internal server error occurred.

## Discussion

Get information about a merchant you previously registered. You provide the merchant's unique identifier (`partnerInternalMerchantIdentifier`). A successful response contains a [MerchantDetails](#) object in the response body.
