# WidgetKit updates

Learn about important changes in WidgetKit.

## Overview

Browse notable changes in [WidgetKit](#).

## June 2025

### General

- Support Liquid Glass by using the [WidgetAccentedRenderingMode](#).
- Use WidgetKit push notifications to request timeline reloads from the system by registering a [WidgetPushHandler](#).
- Update your [WidgetFamily.systemSmall](#) widget to make sure it appears correctly in CarPlay.
- Create controls that use [ControlWidgetButton](#) to execute an action and [ControlWidgetToggle](#) to toggle some state in your app in watchOS and macOS.

### Vision Pro

- Widgets are available on Apple Vision Pro. Support [elevated](#) and [recessed](#) mounting styles, choose [glass](#) or [paper](#) textures, and specify layouts for each [LevelOfDetail](#) to show more or less information based on a person's proximity.

### Apple Watch

- Offer a relevance-based watchOS widget that uses a [RelevanceConfiguration](#).
- Let people configure your watchOS widget by offering a widget that uses [AppIntentConfiguration](#).

## June 2024

### General

- Controls allow people to customize and configure Control Center, their Lock Screen, and the Action button with actions from your apps. Take advantage of [ControlWidgetButton](#) to execute an action and [ControlWidgetToggle](#) to toggle some state in your app.
- Accent views of widgets on iOS and iPadOS using [widgetAccentable\( :\)](#).

### Apple Watch

- Create interactive widgets on watchOS using a [Button](#) or [Toggle](#) to perform actions without launching your app.
- Use an [AccessoryWidgetGroup](#) container to provide up to three content views, optionally interactive, in a watchOS widget. Style [AccessoryWidgetGroup](#) content views using [circular](#) or [roundedSquare](#).
