Article

Choosing tax codes for your SKUs

Select a tax code for each SKU that represents a product your app offers as an in-app purchase.

Overview

Each SKU, which represents a unique product that your app offers as an in-app purchase, needs a tax code. You provide the tax code value each time you use the Advanced Commerce API to transact.

Use the following table to look up tax codes for your products.

Note

Other tax codes are available, similar to those listed in [Set a tax category](#). If you don't see an appropriate tax code for your product in the table below, send a request using the Advanced Commerce API Access form on the [Advanced Commerce API](#) page.

Look up tax codes for in-app purchases

Select the tax code for your subscription or one-time purchase based on the following tax categories, subcategories, and attributes. You can use the App Store Software category as a default.

Tax category / Tax subcategory	Selected attributes	Tax code for subscriptions	Tax code for one-time purchases
App Store Software (Default)	No selectable attributes	C003-00-1	C003-00-2
Audiobooks / Has ISBN, ISSN, or ECN	Available for offline listening	S007-01-1	S007-01-2
Audiobooks / Has ISBN, ISSN, or ECN	<p>Available for offline listening</p> <p>The standard (list) price is displayed</p> <p>Contains stories with distributed speaker roles, noises, and music</p>	S007-010409-1	S007-010409-2
Audiobooks / Does not have ISBN, ISSN, or ECN	Available for offline listening	S008-02-1	S008-02-2
