# Apple News

Design, create, and publish signature content for Apple News.

Apple News API 1.0+ | Apple News Format 1.7+

## Overview

Apple News is an iOS, iPadOS, macOS, and visionOS app that delivers articles from newspapers, magazines, websites, and other sources. News automatically optimizes your content for iPhone, iPad, Mac, and Apple Vision Pro to give your readers the best experience for their device.

As an Apple News publisher, you can use the in-depth design capabilities of Apple News Format to create unique articles with beautiful typography, compelling animations, and rich photo galleries and videos. You can then use the Apple News API to publish your content to News and manage your published articles.

# Topics

## Essentials

### Getting Started as an Apple News Publisher

Provide information about your publication and choose how to publish content.

## Article Design and Creation

### Apple News Format Tutorials

Create a basic article and then add advanced design features.
