[Accelerate](#) / [vDSP](#) / Quadratic interpolation functions

API Collection

Quadratic interpolation functions

Compute the quadratic interpolation between the neighboring elements in a vector.

Topics

Vector-to-Vector Quadratic Interpolation

`vDSP_vqint`

Calculates single-precision vector quadratic interpolation.

`vDSP_vqintD`

Calculates double-precision vector quadratic interpolation.

See Also

Vector interpolation

≡ Linear interpolation functions

Compute the linear average between two vectors or between the neighboring elements in one vector.
