

[Speech](#) / AssetInstallationRequest

Class

# AssetInstallationRequest

An object that describes, downloads, and installs a selection of assets.

iOS 26.0+ | iPadOS 26.0+ | Mac Catalyst 26.0+ | macOS 26.0+ | visionOS 26.0+

```
@objc  
final class AssetInstallationRequest
```

## Overview

You do not create instances of this type directly; obtain them from [assetInstallationRequest\(supporting:\)](#).

The system consolidates download and installation requests; you may obtain several of these instances and call [downloadAndInstall\(\)](#) several times without causing redundant downloads.

## Topics

### Performing an installation request

```
func downloadAndInstall() async throws
```

Downloads and installs assets not already on the device.
