[App Data Transfer](#) / DownloadError

Object

DownloadError

An object that describes an error the server encounters while preparing download URLs for a request.

App Data Transfer 1.0+

```
object DownloadError
```

Properties

statusCheckDelay	The number of seconds to wait before re-requesting the status. integer
status	The outcome of the operation. Value: error
statusMessage	The reason the server encountered an error. Possible Values: <code>in_progress</code> , <code>request_not_found</code> , <code>invalid_request_status</code>

Overview

The `statusMessage` field has one of these values:

`invalid_request_status`

The download request isn't complete and you need to request the download URLs again after `statusCheckDelay` seconds.

`request_not_found`

The request ID you provided isn't recognized.
