## Structure

# MobileNationalIDCardDataRequest

A mobile national ID card request that retrieves elements from the holder and returns the validated document elements.

iOS 18.0+ | iPadOS 18.0+ | Mac Catalyst 18.0+ | visionOS 2.0+

```
struct MobileNationalIDCardDataRequest
```

## Topics

### Creating a data request

```
init(region: Locale.Region, retainedElements: [MobileNationalIDCardDataRequest.Element], nonRetainedElements: [MobileNationalIDCardDataRequest.Element])
```

Creates a mobile national ID card data request.

### Determining the region availability

```
static func isSupportedRegion(Locale.Region) -> Bool
```

Returns a Boolean value that indicates whether you can make a request for the specified region.

### Configuring the request details

```
var region: Locale.Region
```

The region of the document you're requesting.

```
var retainedElements: [MobileNationalIDCardDataRequest.Element]
```

The document elements you're requesting and intend to retain for an indefinite period of time.

```
var nonRetainedElements: [MobileNationalIDCardDataRequest.Element]
```

The document elements you're requesting and intend to retain no longer than necessary to process the result in realtime.

```
struct Element
```

A type that represents an element you can request from a mobile national ID card.

## Handling the Response

```
struct Response
```

A type that contains the response information from a successful mobile national ID card data request.
