

[AppKit](#) / [NSToolbar](#) / delegate

## Instance Property

# delegate

The object you use to customize the toolbar contents and configuration.

iOS 13.0+ | iPadOS 13.0+ | Mac Catalyst 13.1+ | macOS

```
@MainActor  
weak var delegate: (any NSToolbarDelegate)? { get set }
```

## Discussion

Assign an object to this property if you customize the toolbar's behavior. The object you assign to this property must adopt the [NSToolbarDelegate](#) protocol.
