

[Network Extension / Relays](#)

API Collection

Relays

Create and manage a system-wide network relay configuration that uses built-in proxying for TCP and UDP traffic over HTTP/3 and HTTP/2.

Topics

Essentials

[Network Extensions Entitlement](#)

The APIs an app can use to customize networking features.

Relay configuration

`class NERelayManager`

An object you use to create and manage a network relay configuration.

`class NERelay`

A single relay server configuration that you can chain together with other relays.
