## Property List Key

# NSEExceptionMinimumTLSVersion

The minimum Transport Layer Security (TLS) version for network connections.

iOS 9.0+ | iPadOS 9.0+ | macOS 10.11+ | visionOS 1.0+

---

## Details

### Type

String

## Possible Values

### TLSv1.0

Require a minimum TLS version of 1.0.

### TLSv1.1

Require a minimum TLS version of 1.1.

### TLSv1.2

Require a minimum TLS version of 1.2.

### TLSv1.3

Require a minimum TLS version of 1.3.

## Attributes

Default: TLSv1.2

## Discussion

This key is optional. The value is a string, with a default value of TLSv1.2.

### Important

You must supply a justification during App Store review if you use this key to set a protocol version lower than 1.2, as described in [Provide Justification for Exceptions](#).

## See Also

### Exceptions

`NSEExceptionAllowsInsecureHTTPLoads`

A Boolean value indicating whether to allow insecure HTTP loads.

`NSEExceptionRequiresForwardSecrecy`

A Boolean value indicating whether to override the perfect forward secrecy requirement.

`NSRequiresCertificateTransparency`

An obsolete Boolean value indicating whether to require Certificate Transparency.
