# Prerelease Versions and Beta Testers

Manage your beta testing program, including beta testers and groups, apps, App Clips, and builds.

## Overview

TestFlight allows you to distribute your apps to beta testers before releasing your apps on the App Store. You can learn more about TestFlight on the [Apple Developer website](#).

Using the App Store Connect API, you can automate the same tasks you perform in the TestFlight section of App Store Connect; for example:

- Inviting testers to your app
- Managing your builds, groups, and public links
- Creating App Clip experiences for testers
- Submitting your build for external beta testing

---

## Topics

### Beta Testers and Groups

#### ☰ Beta Testers

People who can install and test prerelease builds.

#### ☰ Beta Tester Invitations

Requests to send or resend an email inviting a beta tester to test an app.

#### ☰ Beta recruitment criteria

Create public links that accept testers with specific device and OS combinations.

### ☰ Beta Groups

Groups of beta testers that have access to one or more builds.

## App Resources

### ☰ Prerelease Versions

Platform-specific versions of your app intended for distribution to beta testers.

### ☰ Beta App Localizations

Beta test information about apps, specific to a locale.

### ☰ Beta License Agreements

Beta license agreements for apps.

## App Clip Resources

### ☰ Beta App Clip Invocations

Manage App Clip experiences for testers in TestFlight.

### ☰ Beta App Clip Invocation Localizations

Manage beta test information for an App Clip and its invocation, specific to a locale.

## Build Resources

### ☰ Builds

Manage builds for testers and submit builds for review.

### ☰ Build Beta Details

TestFlight-specific information about beta builds.

### ☰ Beta Build Localizations

Beta test information about builds, specific to a locale.

### ☰ Build Beta Notifications

Requests to send notifications to all assigned testers that builds are ready for testing.

## Beta App Review Submissions

### Beta App Review Detail

Information about your app required for beta app review.

### Beta App Review Submissions

The submissions of builds for beta app review, including the status of submissions.

## Beta Feedback

### Beta feedback crash submissions

Get TestFlight feedback crashes from beta testers for your apps.

### Beta feedback screenshot submissions

Get Testflight feedback screenshots from beta testers for your apps.
