Overview

Note

This sample code project is associated with the WWDC23 session [10244: Create rich documentation with Swift-DocC](#) and WWDC22 sessions [110368: What's new in Swift-DocC](#) and [110369: Improve the discoverability of your Swift-DocC content](#). It's also associated with WWDC21 sessions [10166: Meet DocC documentation in Xcode](#), [10167: Elevate your DocC documentation in Xcode](#), [10236: Host and automate your DocC Documentation](#), and [10235: Build interactive tutorials in DocC](#).

Configure the sample code project

To build documentation for this package, use Xcode 13, open the `Package.swift` file, and select Product > Build Documentation.
