

[Assignables](#) / AssignedWorkDocumentView

Structure

AssignedWorkDocumentView

SwiftUI View to display an AssignedWorkDocument

iOS 17.4+ | iPadOS 17.4+ | Mac Catalyst 17.4+ | visionOS

```
@MainActor @preconcurrency
struct AssignedWorkDocumentView
```

Topics

Creating a document view

```
init(document: Binding<AssignedWorkDocumentView.Document>, activePartID: MergeablePartsContainerPartID?, hiddenPartIDs: [MergeablePartsContainerPartID], selectedPageID: Binding<AssignedWorkDocumentView.Document.Page.ID?>?, selectedQuestionID: Binding<AssignableDocument.Question.ID?>?, showsPageThumbnails: Bool, isStructureEditingEnabled: Bool)
```

Displays an AssignedWorkDocument.

Implementing a view

`typealias Document`

The document type that this view presents.

Initializers

```
init(document: Binding<AssignedWorkDocumentView.Document>, activePartID  
: MergeablePartsContainerPartID?, hiddenPartIDs: [MergeableParts  
ContainerPartID], selectedPageID: Binding<AssignedWorkDocumentView.  
Document.Page.ID?>?, selectedQuestionID: Binding<AssignableDocument.  
Question.ID?>?, showsPageThumbnails: Bool, isStructureEditingEnabled:  
Bool, onMarkupActivation: (Bool) -> Void)
```

Displays an AssignedWorkDocument.

Relationships

Conforms To

Sendable, SendableMetatype, View
