[Accelerate](#) / [vDSP](#) / Transposition

API Collection

Transposition

Transpose vectors that contain real values.

Topics

Transposing real matrices

`vDSP_mtrans`

Transposes a single-precision matrix.

`vDSP_mtransD`

Transposes a double-precision matrix.

See Also

Matrix operations

☰ Multiplication

Multiply vectors that contain real or complex values.

☰ Matrix and submatrix copying functions

Copy the contents of a submatrix to another submatrix.
