# Artwork

An object that represents artwork.

Apple Music 1.0+

object Artwork

---

## Properties

**bgColor**  
string  
The average background color of the image.

**height**  
number  
**(Required)** The maximum height available for the image.

**width**  
number  
**(Required)** The maximum width available for the image.

**textColor1**  
string  
The primary text color used if the background color gets displayed.

**textColor2**  
string  
The secondary text color used if the background color gets displayed.

**textColor3**  
string  
The tertiary text color used if the background color gets displayed.

**textColor4**  
string  
The final post-tertiary text color used if the background color gets displayed.

**url** string **(Required)** The URL to request the image asset. {w}x{h} must precede image filename, as placeholders for the width and height values as described above. For example, {w}x{h}bb.jpeg).
