

[Authentication Services](#) / `ASAuthorizationAccountCreationProvider`

Class

# ASAuthorizationAccountCreationProvider

iOS 26.0+ | iPadOS 26.0+ | Mac Catalyst 26.0+ | macOS 26.0+ | visionOS 26.0+

```
@objc  
class ASAuthorizationAccountCreationProvider
```

## Topics

### Initializers

`init()`

### Instance Methods

```
func createPlatformPublicKeyCredentialRegistrationRequest(accepted  
ContactIdentifiers: [ASContactIdentifierRequest], shouldRequestName:  
Bool, relyingPartyIdentifier: String, challenge: Data, userID: Data) ->  
ASAuthorizationAccountCreationPlatformPublicKeyCredentialRequest
```

Create a new account creation request backed by a platform public key credential, i.e. a passkey.
