Mentioned in

 Downloading Analytics Reports

Discussion

When making a request with this endpoint, the accessType ONGOING is most common and provides current data. This report request generates reports daily for each granularity: daily, weekly, and monthly. Use ONE_TIME_SNAPSHOT to get historical data.

Example Request and Response

Request Response

```
POST https://api.appstoreconnect.apple.com/v1/analyticsReportRequests
```

```
{  
    "data": {  
        "type": "analyticsReportRequests",  
        "attributes": {  
            "accessType": "ONGOING"  
        },  
        "relationships": {  
            "app": {  
                "data": {  
                    "type": "apps",  
                    "id": "1476097583"  
                }  
            }  
        }  
    }  
}
```
